

FlexiGlide **Vision Guard** sliding folding security shutter

A tough, open style shutter that provides a high level of security while keeping a sense of open space.

The Vision Guard sliding folding grille combines good airflow and visibility with excellent security. The curtain consists of cut-out aluminium panels filled in with vertical aluminium rods. This provides a similar level of openness as the Classic Chainlink, but with an increased level of security.

- Excellent airflow and visibility
- Increased level of security
- Available in any colour

Finishes

Standard finishes clear anodised, painted white, black, or bronze. Optional in any RAL colour (subject to availability).

Weight

7.3 kg/square metre
